### Description

As a QA engineer,

I want to test all functionalities thoroughly,

So that we deliver a bug-free and secure application.

**Scope:** Manual and automated test execution. **Preconditions:** Application is feature-complete.

#### Acceptance Criteria:

- · Manual and automated test cases written.
- · Functional, UI, and integration tests passed.
- · Bugs tracked and resolved in Jira.

### Description

As a Unix user,

I want to write a shell script that compresses and backs up the frontend code every evening,

So that code is safe and stored daily.

**Scope:** Bash script with cron job. **Preconditions:** Unix terminal access.

Acceptance Criteria:

- · Script created and tested
- Runs via cron daily
- · Backup stored in compressed file

#### Description

As a frontend developer,

I want to design a responsive user registration and login page using HTML5, CSS3, and Bootstrap 5,

So that users can access the app on any device.

Scope: HTML form, CSS styling, Bootstrap grid layout.

Preconditions: Project skeleton is ready.

Acceptance Criteria:

- Responsive registration and login forms
- · Styled with Bootstrap
- Accessible from mobile/tablet/desktop

# Description

As a developer,

I want to expose CRUD APIs for health data,

So that the frontend can interact with the backend seamlessly.

Scope: RESTful API development using Spring Boot.

Preconditions: Spring Boot setup completed.

#### Acceptance Criteria:

- · API to create, read, update, delete health entries.
- API for user login and registration.
- · API returns proper status codes and messages.

#### Description

### As a UI engineer,

I want to use JavaScript and jQuery to add client-side validation for the health metrics form (steps, sleep hours, calories), So that users input correct data before submission.

**Scope**: Validation script for form inputs. **Preconditions**: Form fields present in HTML.

Acceptance Criteria:

- All fields validated on client-side
- Alerts for incorrect/missing values
- Smooth UX with jQuery

#### Description

As a Scrum Master,

I want to create the product backlog and epics in Jira and facilitate a daily standup process,

So that the team follows Agile methodology.

**Scope:** Jira board creation, backlog planning, sprint planning, standup facilitation.

Preconditions: Jira access and Scrum team defined.

#### Acceptance Criteria:

- · Jira board with epics and user stories
- · Sprint 1 created with issues assigned
- Daily standup calendar shared
- · Team understands Agile workflow
